**Approach, methodology and strategy**

- Support for drafting of WHS plans using the WUMP process
- Multi-stakeholder approach
- Programmatic and modular approach
- Inter-project partnership
- Capacity-building
- Private sector involvement in water infrastructure implementation and management
- Interventions in schools – “Blue Schools” and normal schools
- Gender and social equity
- Support to develop a management plan

**Lessons learnt**

- Cooperation with existing projects and programmes

**Good practice**

- Technical WASH support on municipal level
- Investor-manager approach
- Vulnerability analysis based on the tool ‘family picture’
- Multi stakeholder approach

**Advocacy & political dialogue**

- Capacity building for consumer households to maintain water, hygiene and sanitation (WHS) services put in place
- Capacity building for the WHS civil society organisations on regional level
- National level knowledge and information sharing on the importance of technical service for WHS and the investor-manager approach
